

SECTION 017426 – FINAL CLEANUP/SITE RESTORATION

PART 1 – GENERAL

1.1 DESCRIPTION

- A. Under this item, the Contractor shall restore the work site and access area to its original condition including, but not limited to, topsoil and hydro-seeding, repair of pavement and sidewalks, roadways, curbs, cleaning and removal of stockpiles and equipment, any underground electrical conduit servicing the site and all else not specifically covered elsewhere in these specifications. All on-site catch basins and pipes along the access driveway shall be cleaned of all debris and televised. All soil erosion and traffic control devices along the perimeter of the project site shall be removed and pavement restored within its vicinity.

PART 2 – PRODUCTS

2.1 MATERIALS

- A. NJDOT Standard Specifications.

PART 3 – EXECUTION

3.1 METHODS OF CONSTRUCTION

- A. The site shall be returned to its original condition. Temporary safety fence shall be removed. All pavement and sidewalk where construction fence was previously located shall be repaired. Cleaning shall include hand-brooming of sidewalk and pavement areas. Sidewalks shall be replaced with four-inch-thick concrete walk in evenly-sized slabs, sawcut where necessary, only to the extent damaged by the construction. Both concrete and bituminous concrete shall be repaired as specified by the Engineer, sawcut where necessary, only to the extent damaged by the construction. All construction equipment and stockpiles shall be removed from the site and disposed of by the Contractor in a suitable and timely manner.
