WOOD FRAMING GENERAL NOTES

1. All framing shall be of the type and size specified on the architectural drawings.
2. All studs and joists shall be installed in the direction of the primary load.
3. All floor and roof framing shall be installed before the application of the architectural finishes.
4. All framing shall be framed to the exterior walls as specified on the architectural drawings.
5. All framing shall be installed to the ceiling joists as specified on the architectural drawings.
6. All framing shall be installed to the roof deck as specified on the architectural drawings.
7. All framing shall be installed to the foundation as specified on the architectural drawings.
8. All framing shall be installed to the subfloor as specified on the architectural drawings.
9. All framing shall be installed to the exterior sheathing as specified on the architectural drawings.
10. All framing shall be installed to the interior sheathing as specified on the architectural drawings.

CUTTING & NOTCHING JOIST CUTTING NOTES

1. All joists shall be cut to the length specified on the architectural drawings.
2. All joists shall be cut at 90° angles.
3. All joists shall be cut to the height specified on the architectural drawings.
4. All joists shall be cut to the width specified on the architectural drawings.
5. All joists shall be cut to the depth specified on the architectural drawings.
6. All joists shall be cut to the length specified on the architectural drawings.
7. All joists shall be cut to the height specified on the architectural drawings.
8. All joists shall be cut to the width specified on the architectural drawings.
9. All joists shall be cut to the depth specified on the architectural drawings.
10. All joists shall be cut to the length specified on the architectural drawings.

CUTTING & NOTCHING STUD CUTTING NOTES

1. All studs shall be cut to the length specified on the architectural drawings.
2. All studs shall be cut at 90° angles.
3. All studs shall be cut to the height specified on the architectural drawings.
4. All studs shall be cut to the width specified on the architectural drawings.
5. All studs shall be cut to the depth specified on the architectural drawings.
6. All studs shall be cut to the length specified on the architectural drawings.
7. All studs shall be cut to the height specified on the architectural drawings.
8. All studs shall be cut to the width specified on the architectural drawings.
9. All studs shall be cut to the depth specified on the architectural drawings.
10. All studs shall be cut to the length specified on the architectural drawings.

POST-INSTALLED ANCHOR GENERAL NOTES

1. All post-installed anchors shall be installed in accordance with the manufacturer's instructions.
2. All post-installed anchors shall be installed in the direction specified on the architectural drawings.
3. All post-installed anchors shall be installed in the height specified on the architectural drawings.
4. All post-installed anchors shall be installed in the width specified on the architectural drawings.
5. All post-installed anchors shall be installed in the depth specified on the architectural drawings.
6. All post-installed anchors shall be installed in the length specified on the architectural drawings.
7. All post-installed anchors shall be installed in the height specified on the architectural drawings.
8. All post-installed anchors shall be installed in the width specified on the architectural drawings.
9. All post-installed anchors shall be installed in the depth specified on the architectural drawings.
10. All post-installed anchors shall be installed in the length specified on the architectural drawings.

STRUCTURAL STEEL GENERAL NOTES

1. All structural steel shall be fabricated in accordance with the structural engineer's specifications.
2. All structural steel shall be fabricated in accordance with the architectural drawings.
3. All structural steel shall be fabricated in accordance with the construction drawings.
4. All structural steel shall be fabricated in accordance with the material specifications.
5. All structural steel shall be fabricated in accordance with the tolerances specified.
6. All structural steel shall be fabricated in accordance with the material properties specified.
7. All structural steel shall be fabricated in accordance with the load conditions specified.
8. All structural steel shall be fabricated in accordance with the installation sequence specified.
9. All structural steel shall be fabricated in accordance with the quality control procedures specified.
10. All structural steel shall be fabricated in accordance with the safety requirements specified.
